### **NOBU USA N12WTS AND N12TBPC FEATURED IN 2005 NEXTGEN HOMES**

Dedicated to developing the next generation of home automation products, NOBU will showcase there in wall touch panel PC and tablet PC.

Costa Mesa, Calif., May 3, 2005– NOBU USA, a leading provider of home automation products, has teamed up with IShow to showcase Nobu's high-end next generation N12WTS and N12TBPC in the 2005 NextGen Homes. Nobu's N12WTS inwall touch panel pc will be located in the wall at the entrance of the home theater room controlling the home theater system, using CasaWork's award winning software. The demonstration will show the simplicity and convenience of integrating a home theater system.

The demonstration in the NextGen home theater room is first to the future in that one action replaces the remote shuffle. Just insert the DVD in the DVD player then sit down and enjoy the movie because the Cielo theater controller using NOBU's WiFi enabled touchscreen will switch the input on the surround sound receiver to DVD, the video input on the projector to HD1, dim the theater lights, lower the shades, and even adjust the temperature in the theater room for a comfortable movie watching experience. Cielo does everything but serve the popcorn.

"This is truly the best way to demonstrate and showcase high-end home automation," said Ben Yang, Nobu's vice president of business development. "Combining the Nobu's control panels and CasaWorks Software delivers an affordable home automation system without compromise in functionality and sophistication. "

#### **About Nobu**

Launched in February 2001, Nobu is a privately held company comprised of highly-qualified people with an intense focus to be the best in open-source home automation. The company is dedicated to the development of digital living products, the applications of open-source home automation, and simple and practical residential framework systems. By providing quality customer service, innovative technology, and competitive pricing - NOBU has positioned itself to be a leader in the home automation industry.
