**CASAWORKS OFFERS A SIMPLE SOLUTION FOR HOME THEATER CONTROL AT NEXTGEN
2005 DEMONSTRATION HOME**

(CasaWorks, Albuquerque, New Mexico)– CasaWorks, Inc., a home automation innovator, will be demonstrating their Cielo™ Home Management System at NextGen’s AVolution Demonstration Home during the InfoComm Show in Las Vegas, NV, June 8-10, 2005.

The demonstration in the NextGen home theater room shows an ‘AVolution’ in that one action replaces the remote shuffle. The Cielo Home Automation Gateway will switch the input on the surround sound receiver to DVD, the video input on the projector to HD1, dim the theater lights, lower the shades, auto-generate the theater control interface on the touch panel and even adjust the temperature in the theater room for a comfortable movie watching experience. One push of the button on the touch screen is all it takes.

“We are working to make all new supported consumer electronics devices truly interactive and ‘plug and play’ while making home theater and digital media entertainment fun to use,” said Michael Arendall, President and CEO of CasaWorks. “Many home theater components will soon include support for control and integration through IP connectivity. There is a need for a next-generation technology that provides one touch control for home theater operation and allows the consumer to put away the five remote controls that come with a typical system and replace it with a single unified simple interface on a WiFi enabled touch panel device.”

What makes the Cielo Home Management System different from other custom control systems and universal remote controls is that it offers pre-programmed behaviors and screen interfaces that are simple and intuitive. The Cielo system can be easily customized to your specifications by a Cielo dealer and requires no programming. This significantly reduces the cost of a home automation system. Now the consumer can enjoy all the benefits of a high-end home automation system without paying a fortune. The standard Cielo Home Management System includes pre-installed modules for home theater components, climate and lighting control. Visit our website to find out more.

About CasaWorks

CasaWorks is an embedded hardware and software innovator and is developing technologies necessary to implement control in mainstream homes. Using state-of-the-art software technology and tools, the company is creating innovative products that are easy to install and economical to own. With more than 15 years of experience working with software and hardware automation systems in commercial applications, CasaWorks is now focused on the growing residential market. For more information, see the CasaWorks Web site at <http://www.casaworks.com>.
